

FINDING BALANCE

Occupational Therapy • Play Therapy

Play Therapy position available

Finding Balance Occupational Therapy and Play Therapy is a highly successful, well-appointed and resourced, family centred, private practice based in Nedlands and Helena Valley WA. We are seeking a qualified Play Therapist with mental health qualifications to join our ever-expanding quality, private practice. Since I opened my own private practice in Perth in 2017, I have experienced a significant increase in the Perth communities' understanding of Play Therapy as a specialised, counselling approach for young children with mental, emotional, social and behavioural concerns. Such the demand, I now work full time as a Play Therapist and have an experienced Occupational Therapist as part of our dynamic team.

The successful candidate will need to have an ABN and preference will be given to a therapist who is accredited with Medicare (or can be) as Finding Balance receives a significant number of referrals under this plan. The opportunity exists to work in a contractor position from two locations in extraordinary play therapy rooms on a part time basis (1-2 days) with the opportunity for increased hours. Initially, the work would be based in our Nedlands practice however given your availability, our new clinic in Helena Valley can provide additional opportunities.

Extras include:

- Free parking
- Free wifi
- Eftpos/Hicaps
- Referral support
- Flexibility with days/times
- Peer Supervision

Please contact Nina Fitch at nina@findingbalancetherapy.com.au or 0409680716 for more details.
